Table 4

Outpatient regimens for PID
Intramuscular ceftriaxone 250 mg single dose followed by oral doxycycline 100 mg twice daily plus metronidazole twice daily for 14 days
Oral ofloxacin 400 mg twice daily plus oral metronidazole 400 mg twice daily for 14 days
Oral moxifloxacin 400 mg once daily for 14 days
Clinical trial evidence for the following regimen is limited but it may be used when the treatments above are not appropriate, e.g. allergy, intolerance.
Intramuscular ceftriaxone 250 mg immediately, followed by azithromycin 1 g/week for two weeks
