

**Table 2**

**Montreal classification of Crohn's disease<sup>4</sup>**

| Age at diagnosis (years) | Location                                  | Behaviour                            |
|--------------------------|-------------------------------------------|--------------------------------------|
| A1 < 16                  | L1 Ileal                                  | B1 Non-stricturing & non-penetrating |
| A2 17-40                 | L2 Colonic                                | B2 Stricturing                       |
| A3 >40                   | L3 Ileocolonic                            | B3 Penetrating                       |
|                          | L4 Isolated upper GI disease <sup>†</sup> | + p if perianal disease              |

<sup>†</sup> **L4** is a modifier that can be added to **L1-L3** when concomitant upper GI disease is present
